

## Maths Year 11 transition work to A level

In order to fully prepare yourselves for A level Maths we would expect you to complete the '**Year 11 to Year 12 transition booklet**' below to help build upon your understanding of the GCSE higher content.

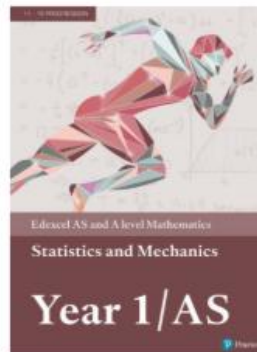

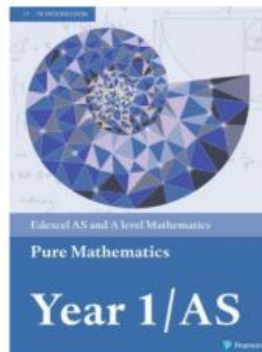

The topics within the booklets are crossover topics between GCSE and A level, therefore, it is imperative that you complete them to ensure that your Maths is up to the standard that is expected to access the rest of the A level course.

### **A LEVEL BOOKLET**

Should you need support with any of the content from the A level booklet, then please watch the relevant videos below;

#### ESSENTIALS FOR THE COURSE

We would recommend that you purchase the following books to support your learning for the first year of A level Maths (which are in line with our A level curriculum):

You will also need to ensure you have a suitable calculator for KS5 mathematics. **We recommend the Casio fx-CW** as the basic level of calculator for the course.
