

Good Websites:

MaChemGuy:

The following playlist has been put together by MaChemGuy – possibly the best A-Level Chemistry channel on YouTube. There are hundreds of really clear videos that explain the different concepts that are covered at A-Level. These videos have been selected to support students in making the jump from GCSE to A-Level Chemistry.

A great all round Chemistry A-Level textbook. There are 6 or 7 editions of this book as its been around for decades! It doesn't really matter which edition you use as they're very similar. Sometimes an older copy can be found on ebay for a bargain! There is a copy or two in the sixth form centre that you can use when on independent study.

One of the best textbooks to help you with the calculations in A-Level Chemistry. Frequent practise of the calculations is essential to ensure you'll be able to answer calculation exam questions. Sometimes older copies for sale on ebay can be picked up for a song.
